The brief does not contain the items of the brief required by 37 CFR 41.37(c)(1) under the appropriate headings and/or in the order indicated. "Summary of claimed subject matter" (replaces summary of invention), "grounds of rejection to be reviewed on appeal" (replaces issues and grouping of claims), "argument", "claims appendix", "evidence appendix", and "related proceedings appendix".

The brief does not contain a concise explanation of the subject matter defined in each of the independent claims involved in the appeal, referring to the specification by page and line number, and to the drawing, if any, by reference characters; and/or does not identify the structure, material, or acts described in the specification as corresponding to each claimed function for every means plus function and step plus function for each independent claim involved in the appeal and for each dependent claim argued separately by reference to the specification by page and line number, and to the drawing, if any, by reference characters, as required by 37 CFR 41.37(c)(1)(v).

The brief does not contain arguments of the appellant with respect to each ground of rejection presented for review, and the basis therefor, with citations of the statutes, regulations, authorities, and parts of the record relied on as required by 37 CFR 41.37(c)(1)(vii).

Each ground of rejection must be treated under a separate heading. For each ground of rejection applying to two or more claims, the claims may be argued separately or as a group. Any claim argued separately should be placed under a subheading identifying the claim by number. A statement which merely points out what a claim recites will not be considered an argument for separate patentability of the claim. See 37 CFR 41.37(c)(1)(vii). For example, since appellant has stated there are two groups in the 'grouping of claims' section (which isn't needed anymore), there should be at least two sub-headings identifying the claims of each group.

The copy of the claims in the claims appendix should be a clean copy (i.e. no status identifiers). And, even though there may not be any "evidence" or "related proceedings" the headings should be provided with a statement saying so.
